# INDEX

ABSTRACTS, Biochemistry, 54.
—, corrections, 105.
—, Immunology, 98.
—, index of authors of, 100.
—, index of subjects of, 101.
—, Nutrition, 92.
—, Pathology, 89.
—, Pharmacology, 64.
—, Physiology, 1.
Amino acid composition of plant seeds, 110.
ARMSTRONG, W. D. Bone metabolism, 201.

BATSON, O. V. Anatomical problems concerned in the study of cerebral blood flow, 139.
Bone metabolism, 201.
BROZEK, J. See TAYLOR and BROZEK, 216.

CARDIAC aspects of convalescence, 223.
CARTER, H. E. and G. E. PHILLIPS. The nutritive value of yeast proteins, 123.
Cerebral blood flow, anatomical aspects of, 139.
—, circulation, control and functional derangements of, 131.
— —, experimental study of, 144.
— —, intrinsic control and clinical phenomena of, 151.
Circulation, peripheral, 228.
C.N.S. dysfunction, psychiatric approach to, 271.
— injuries, convalescence after, 255.
COBB, S. and W. G. LENNOX. Cerebral circulation —intrinsic control and clinical phenomena, 151.
Convalescence and rehabilitation, 188.
COWGILL, G. R., Chairman, Symposium: Human vitamin requirements, 158.

DANN, W. J. Human requirement for nicotinic acid, 159.
DUNBAR, F. Psychosomatic approach to physiological dysfunction and disease, 271.

ELVEHJEM, C. A. Human vitamin requirements, 158.
Energy metabolism and caloric requirements, 193.

FARMER, C. J. Some aspects of vitamin C metabolism, 179.
Fitness, evaluation of, 216.

GASTRO-INTESTINAL function during convalescence, 236.
GELLHORN, E. The rôle of the autonomic nervous system in problems of rehabilitation, 266.
GOLDSTEIN, K. Physiological aspects of convalescence and rehabilitation following central nervous system injuries, 255.
GREGG, D. E. and R. E. SHIPLEY. Experimental approaches to the study of the cerebral circulation, 144.
GROSSMAN, M. I. See IVY and GROSSMAN, 236.

HEGSTED, D. M. See STARE and HEGSTED, 120.
HELLEBRANDT, F. A. Postural adjustments in convalescence and rehabilitation, 243.
HINES, H. M. Neuromuscular denervation, atrophy and degeneration, 231.
HOLT, L. E., JR. The thiamine requirement of man, 171.
HUDDLESTON, O. L. Physiological aspects of physical therapy and rehabilitation, 246.

INTERIM report, American Institute of Nutrition, 109.
— —, American Physiological Society, 105.
— —, American Society for Experimental Pathology, 109.
— —, American Society for Pharmacology and Experimental Therapeutics, 107.
— —, American Society of Biological Chemists, 106, 131.
IVY, A. C. and M. I. GROSSMAN. Gastro-intestinal function during convalescence, 236.

JONES, D. B. Nutritive value of soybean and peanut proteins, 116.

KEYS, A., Chairman, Symposium: Convalescence and rehabilitation, 189.
— and O. MICKELSEN. Vitamin nutrition in convalescence and rehabilitation, 207.

LANDIS, E. M. Circulatory adjustments: The peripheral circulation, 228.
LENNOX, W. G. See COBB and LENNOX, 151.

McCAY, C. M. Increasing the use of plant proteins, 128.
Members, 302.
—, deceased, 370.
—, honorary, 302.
Membership, summary of, 370.
MICKELSEN, O. See KEYS and MICKELSEN, 207.
MITCHELL, H. H. Energy metabolism and caloric requirements, 193.

NERVOUS system, autonomic, in rehabilitation, 266.
Neuromuscular denervation, atrophy and regeneration, 231.
Nicotinic acid, human requirement for, 159.
Nitrogen metabolism, 197.

PARSONS, H. T. Further studies on human requirements for riboflavin, 162.
PETERS, J. P. Problems of nitrogen metabolism, 197.
PHILLIPS, G. E. See CARTER and PHILLIPS, 123.
Physical therapy and rehabilitation, 246.

Physiological knowledge in civilian medicine, 190.
—— —— in the armed services, 192.
Postural adjustments in convalescence and rehabilitation, 243.
Proteins, plant, increasing use of, 128.
——, soybean and peanut, nutritive value of, 116.
——, wheat germ, corn germ and oat, nutritive value of, 120.
——, yeast, nutritive value of, 123.

RESPIRATION, convalescence and rehabilitation, 240.
Riboflavin, human requirements for, 162.
RUSK, H. A. The needs for physiological knowledge: The armed services, 192.

SCHMIDT, C. F., Chairman, Symposium: Cerebral circulation, 131.
SHIPLEY, R. E. See GREGG and SHIPLEY, 144
STARE, F. J. and D. M. HEGSTED. The nutriti value of wheat germ, corn germ and oat pr teins, 120

TAYLOR, H. L. and J. BROZEK. Evaluation fitness, 216.
Thiamine requirement of man, 171.
TILLETT, W. S. The needs for physiologic knowledge: Civilian medicine, 190.

VICKERY, H. B., Chairman, Symposium on su stitutes for animal protein and nutrition, 1
VISSCHER, M. B. Cardiac aspects of convale cence, 223.
Vitamin C metabolism, 179.
—— nutrition in convalescence, 207.
—— requirements, human, 158.
